Profile

Python/ML Developer with 1+ year of experience in computer vision and object detection. Specialized in YOLO model training, optimization, and deployment for mobile applications via TensorFlow Lite. Experienced in developing REST APIs using FastAPI for model deployment. Seeking to leverage deep learning expertise in a growth-oriented AI/ML role.

Professional Experience

Python Developer

05/2024 – present

Concave Tech

- Train custom YOLO models for different clients on product detection tasks.
- Convert and optimize models for mobile deployment using TensorFlow Lite.
- Develop REST APIs using FastAPI and Flask for model inference and web deployment.
- Deploy object detection models achieving high accuracy on client-specific datasets.

Technologies Used: Python, YOLO, TensorFlow Lite, FastAPI, Flask, Docker, SQLite

Education

University of the Punjab

2019 – 2023

Bachelor of Science in Information Technology (BS-IT)

Projects

Real-Time Object Detection Web App

Technologies: YOLO, FastAPI, SQLite, Docker

- Built a web-based object detection system using YOLO model with FastAPI backend.
- Implemented real-time detection with JSON response format for web integration.
- Used Docker for containerized deployment.
- Successfully deployed and tested with live image processing capabilities.

Sentiment Analysis for Recipe App

Technologies: Python, Machine Learning, NLP

- Developed sentiment analysis model to analyze user feedback in recipe rating application.

Desktop Task Manager

Technologies: PyQt5, JSON, Python

- Created desktop application with PyQt5 featuring task management functionality.
- Implemented features: Add, Edit, Delete, Undo, Search, Sort operations.
- Added Dark/Light mode toggle for better user experience.
- Used JSON for data persistence and task storage.

Skills

– Python	– Flask	– FastApi	– TensorFlow Lite
– Pytorch	– YOLO	– Scikit-learn	– Numpy
– Pandas	– Matplotlib	– NLP	– Docker
– SQLite	– PyQt5	– Git	– Github
